FINAL ACTION

Applicant's amendment of 03-07-05 has been fully considered. The amended claims 6, 53 and 54 have overcome the previous 102 rejections based on **Ahluwalia et. al.**, and **Rajappa et. al.** by excluding the disclosed compounds. However, the new proviso does not have support in the specification, and thus, raises new matter.

Claims 1-5, 11, 12, 24-32, 34, 35 and 47-52 have been cancelled.

Claims 6-10, 13-23, 33, 46, 53 and 54 are pending.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

1. **New Matter:** Claims 6-9, 23, 33, 46, 53 and 54 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Claim 6 recites the proviso of "*and further provided that the compound of Formula II is not thieno[2,3-d]pyrimidine-6-carboxylic acid, 1,2,3,4-tetrahydro-1,3-bis(2-methoxyphenyl)-4-oxo-2-thioxo, methyl ester.*" Claims 53 and 54 recite the proviso of "*and further provided that the compound of Formula II is not thieno[2,3-*

d]pyrimidine-6-carboxylic acid, 1,2,3,4-tetrahydro-1,3-bis(2-methoxyphenyl)-4-oxo-2-thioxo, methyl ester or thieno[2,3-d]pyrimidine-6-carboxylic acid, 1,2,3,4-tetrahydro-3,5-dimethyl-2,4-dioxo-1-phenyl, ethyl ester.” The specification does not have support for excluding said compounds in term of a preferred embodiment, which would guide one skilled in the art to select certain compounds, and not others.

Claims 7-9, 23, 33 and 46 are rejected as being dependent on claim 6, 53 or 54 and carrying over the new proviso.

Claim Objections

2. Claims 13-22 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. The species recited in claims 13-22 are not taught or suggested by the prior arts of record.

Allowable Subject Matter

3. Claim 10 is allowable because it recites compounds of Formula III, in which the positions of R^1 , R^4 are fixed relative to R^3 . With the proviso in claim 10 excluding the compound of Rajappa et. al., there is no anticipation or prima facie case of obviousness.

References cited on PTO-892

4. An update search yields related references cited on PTO-892. While they teach compounds of substituted thieno[2,3-d]pyrimidine, they fail to teach a substituent equivalent to

the instant A-B-R³ of the formulae claimed herein. Therefore, said references only show state of the art.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
